

SENYAR GO-LIVE HSE MANAGEMENT SYSTEM APPLICATION

As part of Abu Dhabi Port Strategic Plan to automate Health, Safety and Environment Management System, we are delighted to launch the first phase of the **HSE Management System Application (SENYAR)**.

SENYAR is going live with Traffic Incident, Land and Marine Incident Reporting Modules effective from 12 October 2017.

SENYAR is another milestone achievement towards excellence at Abu Dhabi Ports and will form another key stage in AD Ports digital transformation. The automated Health, Safety and Environment Management System Processes will enable the analysis of HSE metrics in real time, improving accuracy of information and enhancing the overall experience for the end user.

SENYAR will be accessible to all Abu Dhabi Port Users represented by different 15 business roles.

If you face any issues with the application please Contact IT Service Desk on servicedesk@adports.ae or call 2444 for assistance. Your feedback and suggestions are always welcomed at hse.ports@adports.ae

This milestone represents the first step towards automating all HSE Processes
